

For Sale

2009 King Air B200GT

Executive Summary:

Certified in 2007, the B200GT builds and improves upon the most popular aircraft model in its class. It features a 305-knot max cruise speed - a nearly 20-knot speed increase – and a faster rate of climb than the B200. These performance improvements are thanks to the two new Pratt & Whitney Canada PT6A-52 engines; engines designed and manufactured specially for this aircraft. The PT6A-52 engines present a perfect hybrid of the turbine element from the PT6A- 60A found on the Super King Air 350 and the proven quality of the PT6A-42 gearbox seen on the B200

Key Features of this 2009 B200GT:

- Raisbeck Full Epic Platinum Performance Package
- Raisbeck Crown Wing Lockers
- High Float Gear with Fully Enclosed Doors
- Dual Av-Fab Fold Down Seats for Luggage Area
